Settings

Personalise the app. Toggle dark mode and understand how preferences are saved.

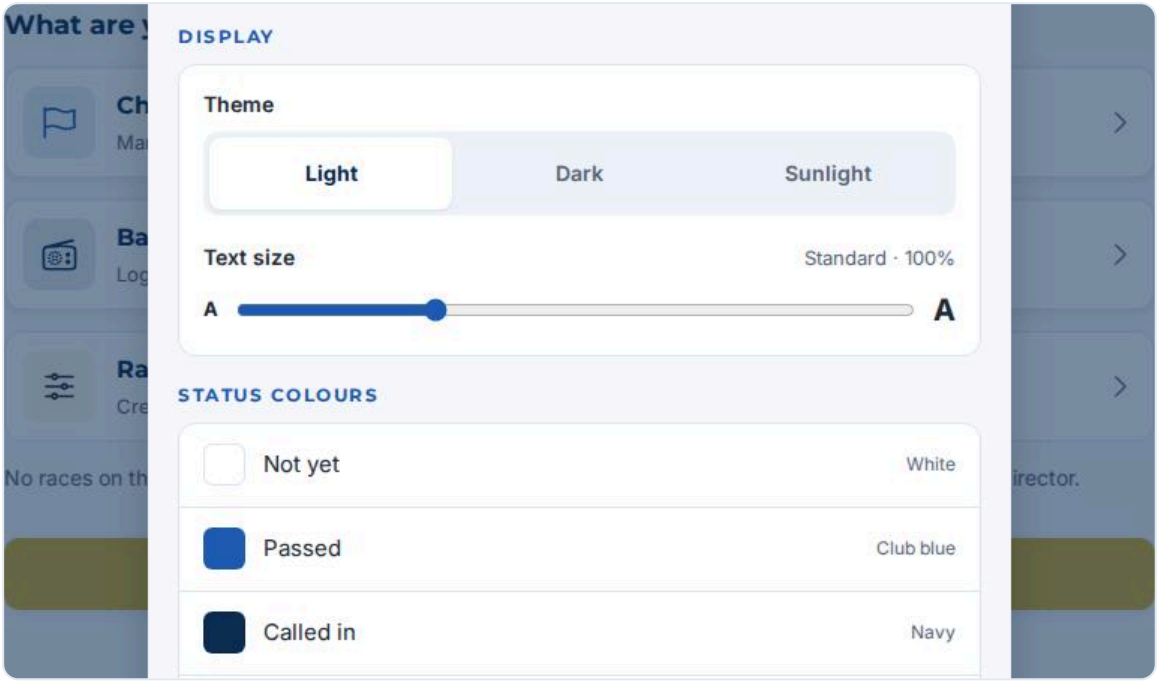

Opens and closes the Settings modal

Tapping the settings cog in the top-right corner should open the settings panel. Pressing the Escape key (or tapping close) should dismiss it cleanly. This test confirms both actions work.

Home — tap Settings cog button (aria-label Settings)

Settings modal — panel open with customisation options

Settings modal — closed after pressing X button

What are you doing today?

Checkpoint
Mark runners as they pass your station

Base station
Log radio calls and watch the whole race

Race setup
Create a race, runners and checkpoints

No races on this device yet. Choose **Race setup** to create one, or scan a race QR code from the race director.

Toggles dark mode on and off

The dark mode toggle in settings switches the app between a light colour scheme and a dark one. This test turns dark mode on, confirms the dark theme is applied, then turns it back off and confirms the light theme is restored.

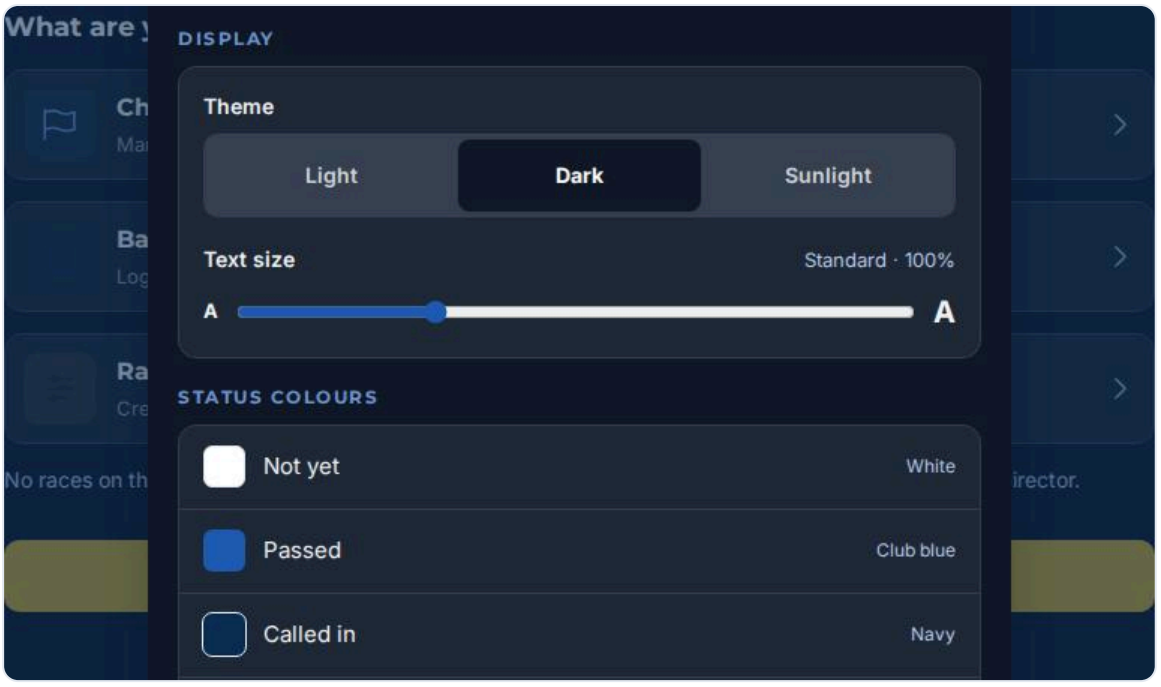

Home — open Settings modal

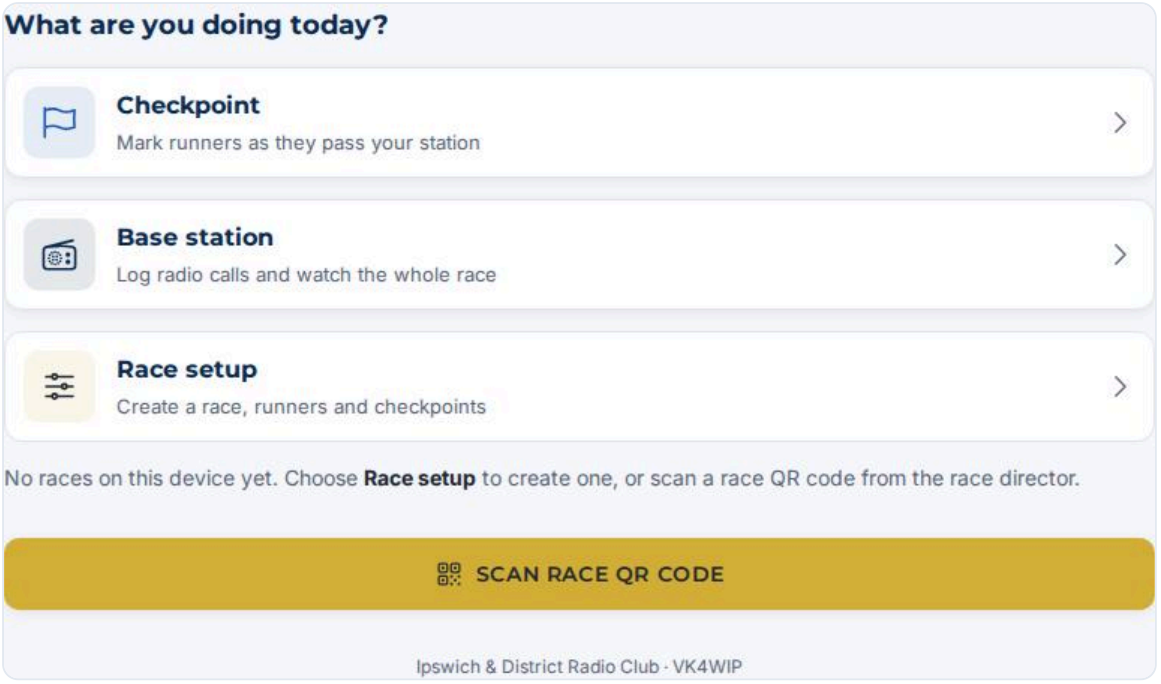

Settings modal — Theme control shows Light, Dark and Sunlight

Dark mode ON — html element gains "dark" class

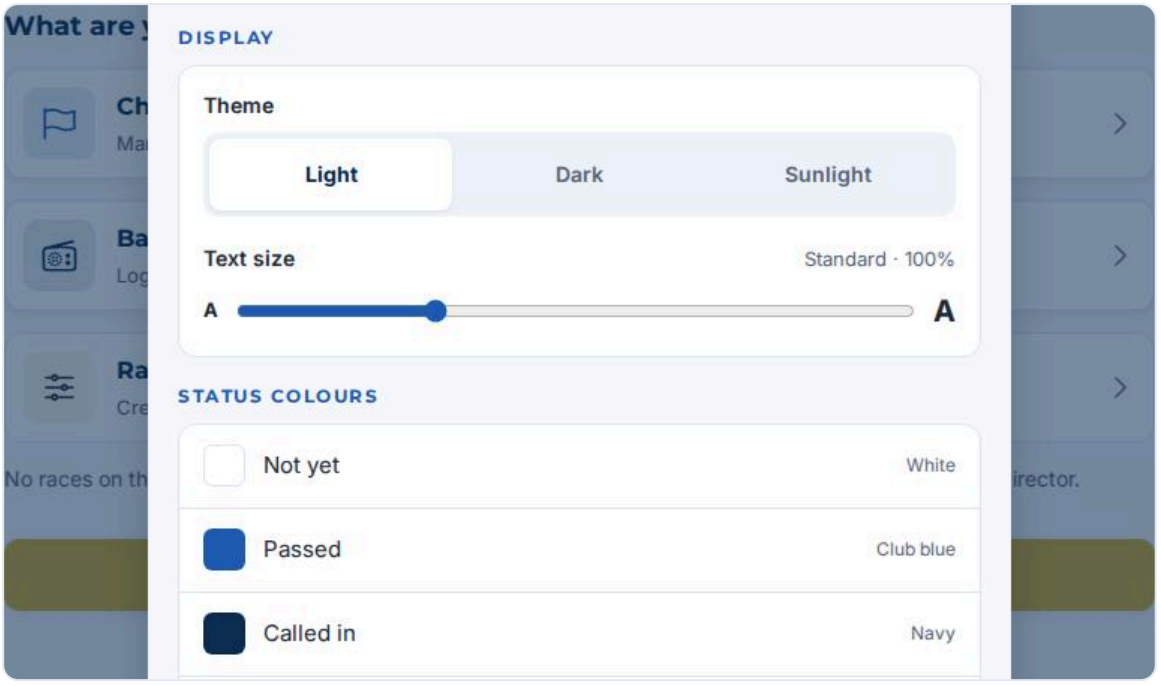

Dark mode OFF — "dark" class removed from html element

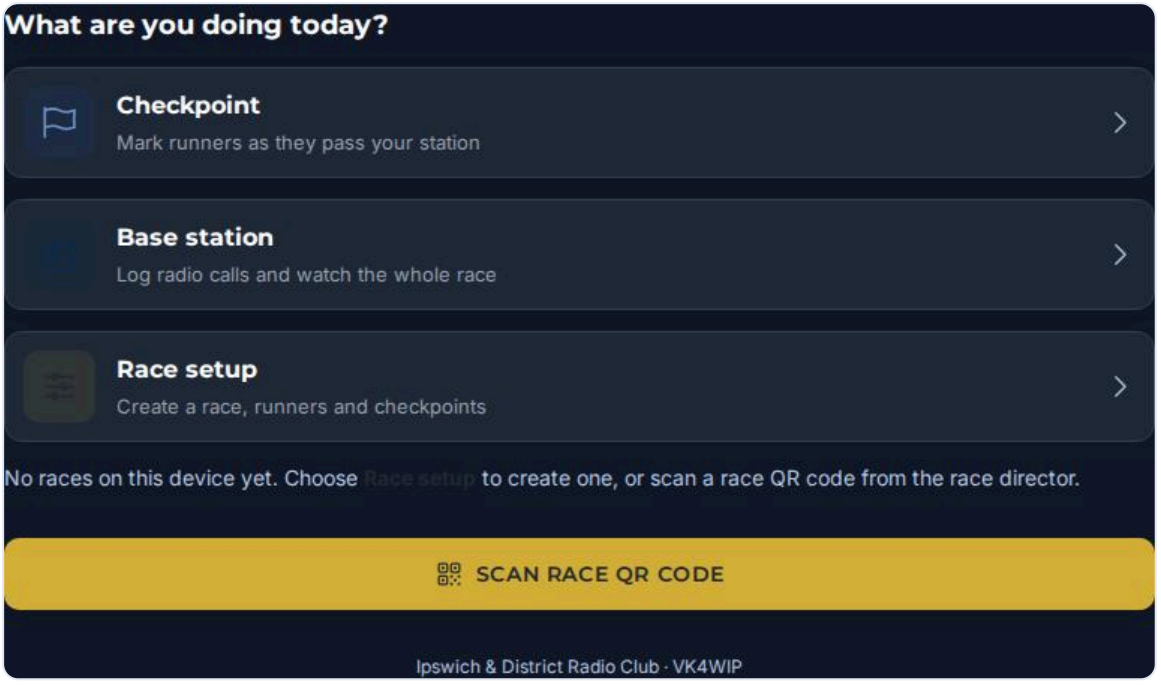

Settings persist after closing and reopening the modal

Changes made in settings should be saved and remembered. If dark mode is turned on and the settings panel is closed then reopened, dark mode should still be on — the preference should not reset.

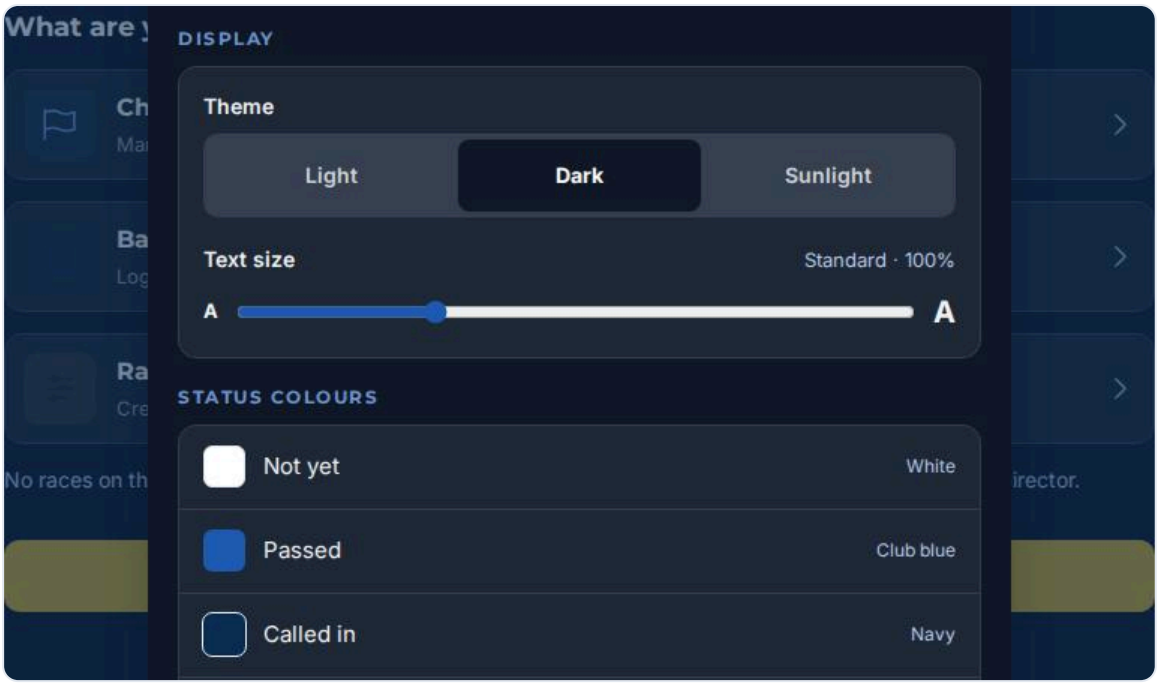

Home — open Settings modal

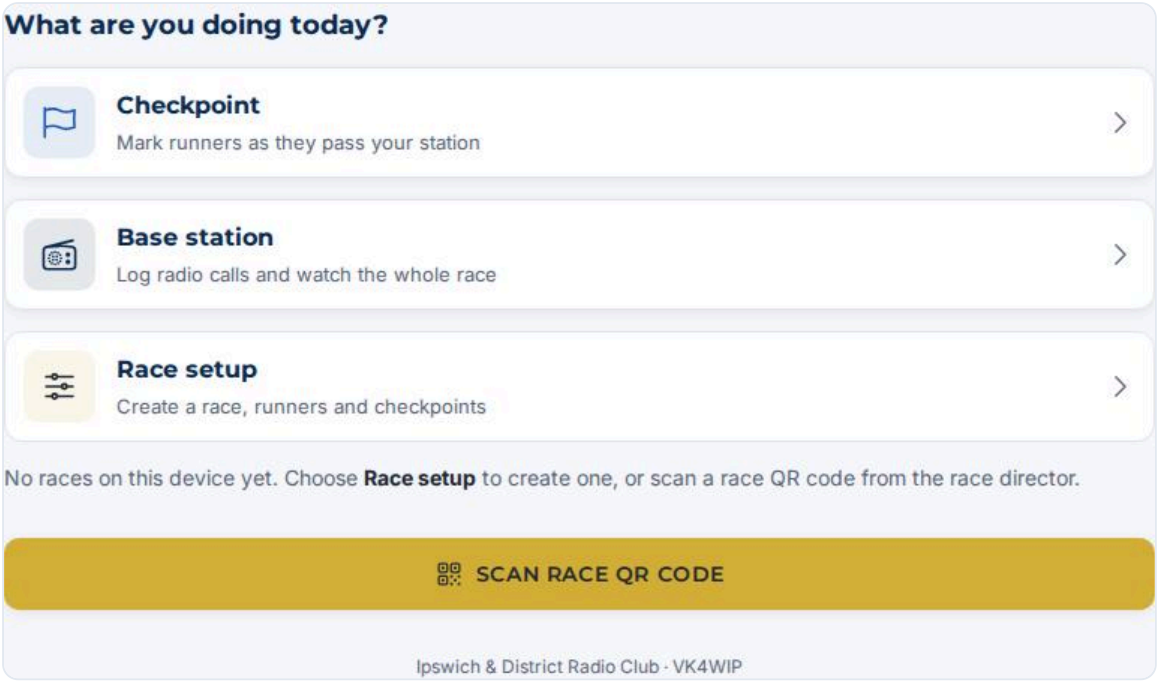

Settings modal — choose Dark theme and save

Home — reopen Settings modal

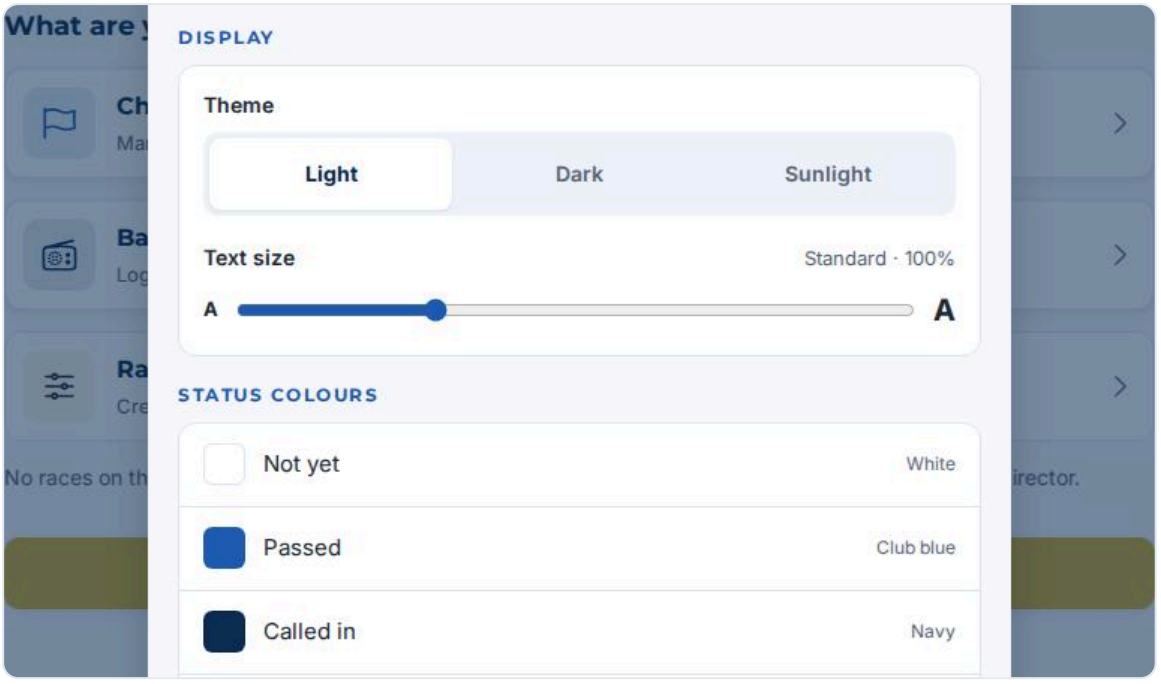

Settings modal — Dark theme is still selected

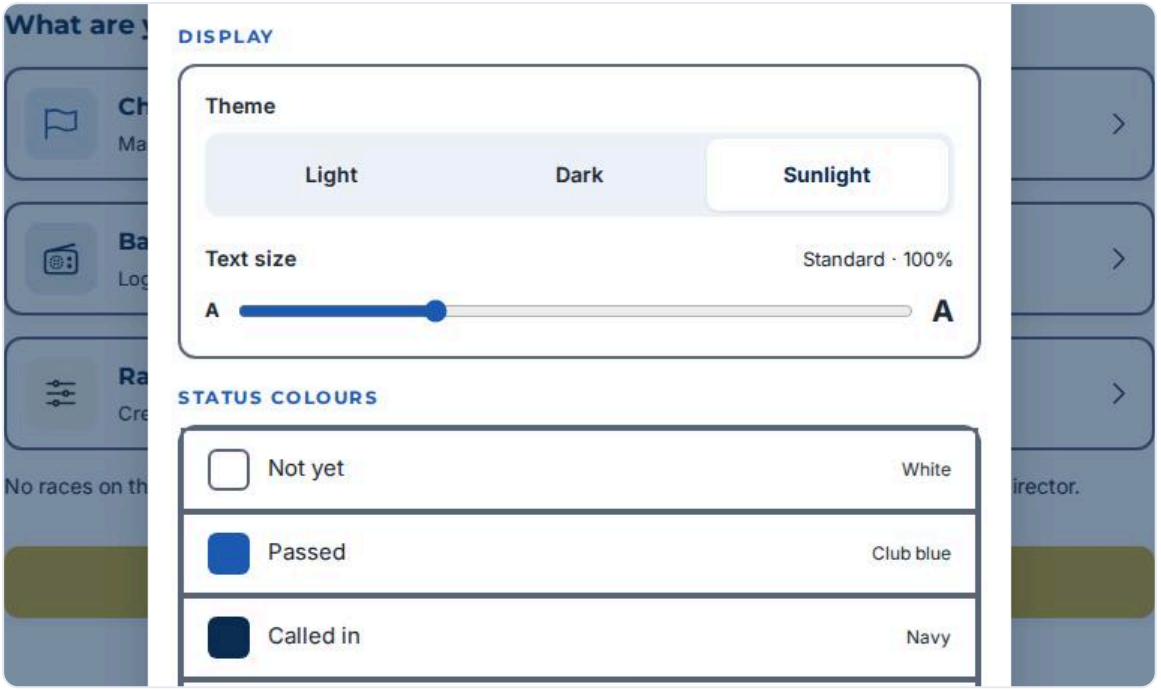

Settings switches theme to sunlight and resets status colours to club colours

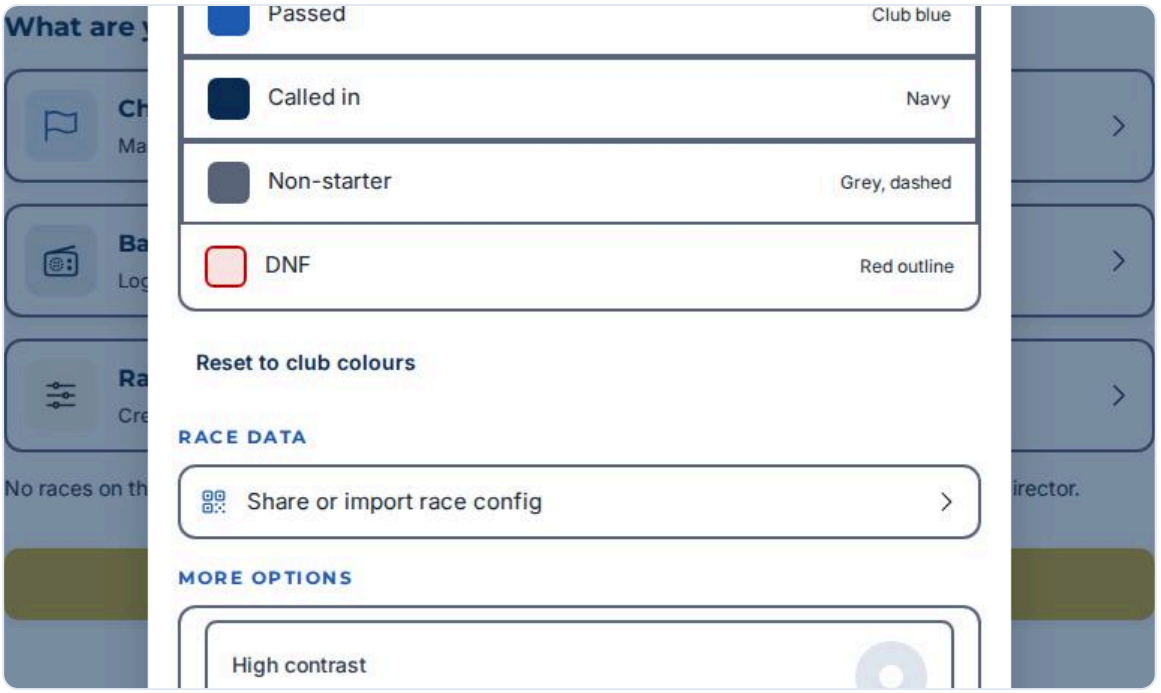

Settings — Display, Status colours and Race data sections

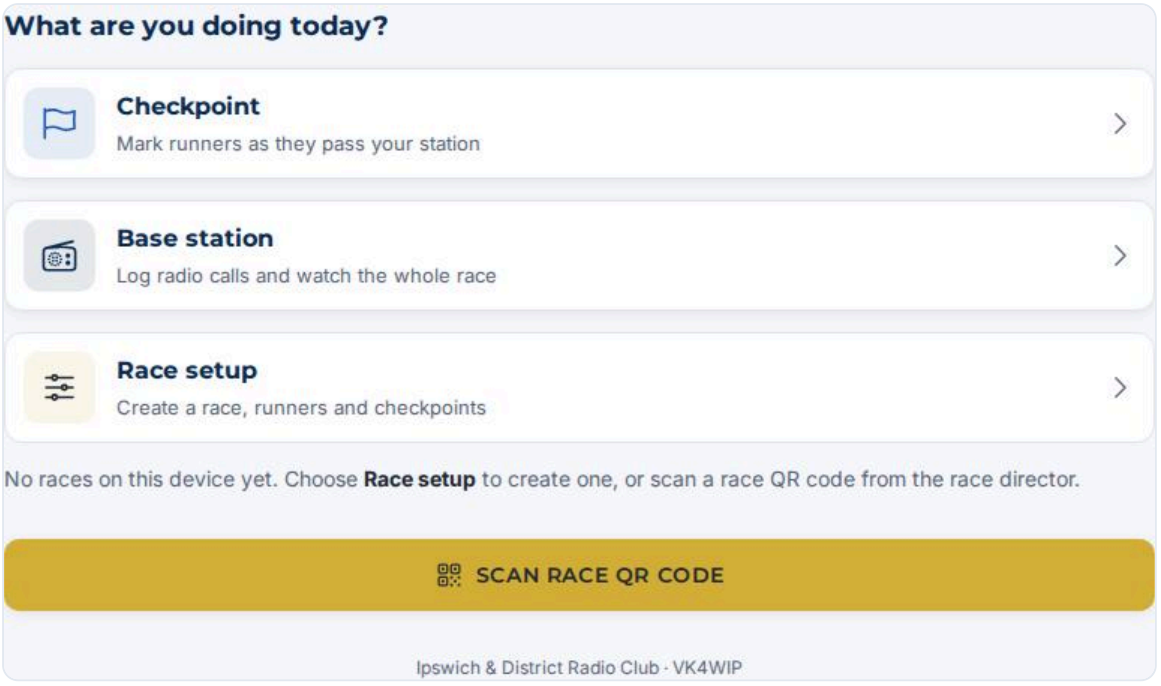

Theme — Sunlight gives a high-contrast white page

Status colours — change Passed, then Reset to club colours

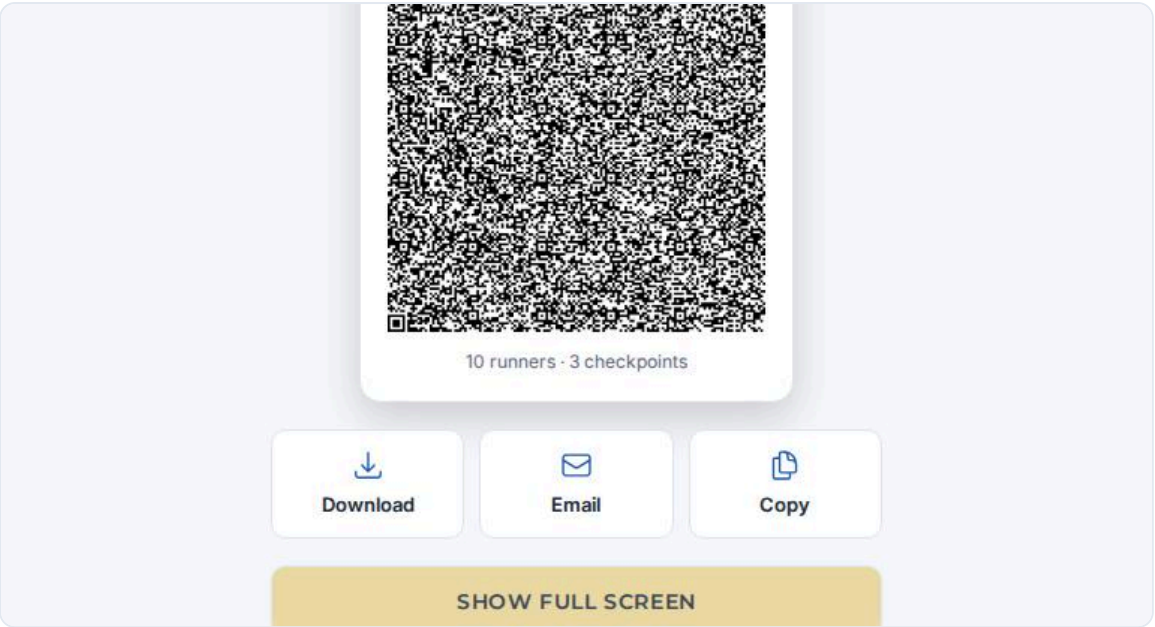

Cancel — nothing is saved, Light theme is back

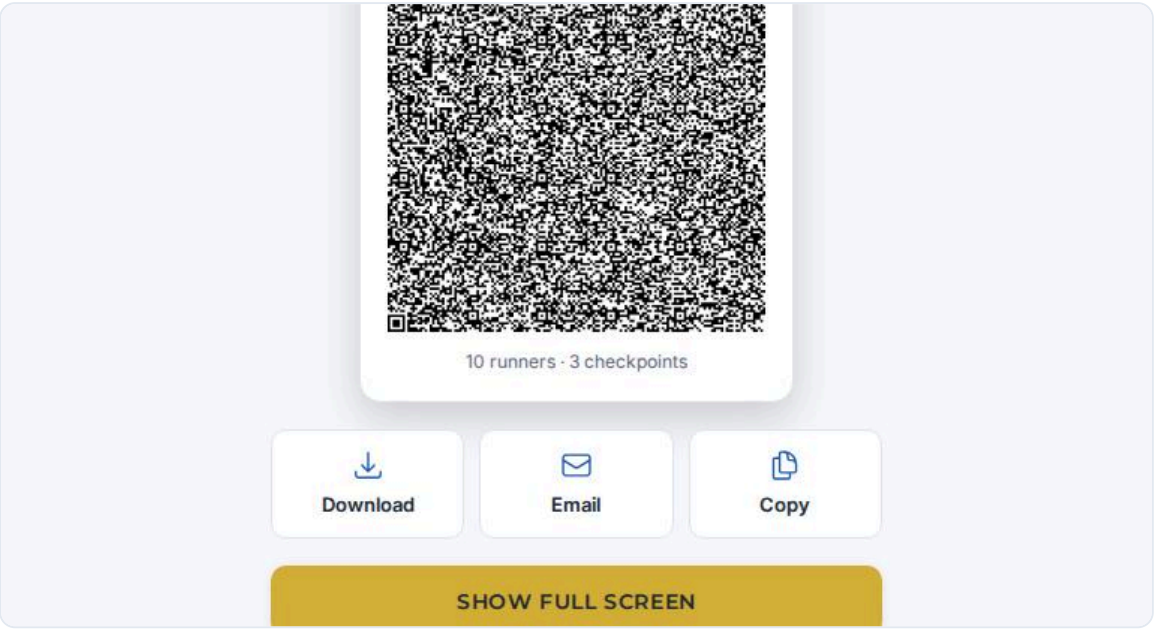

Share race screen offers QR, download, email and copy

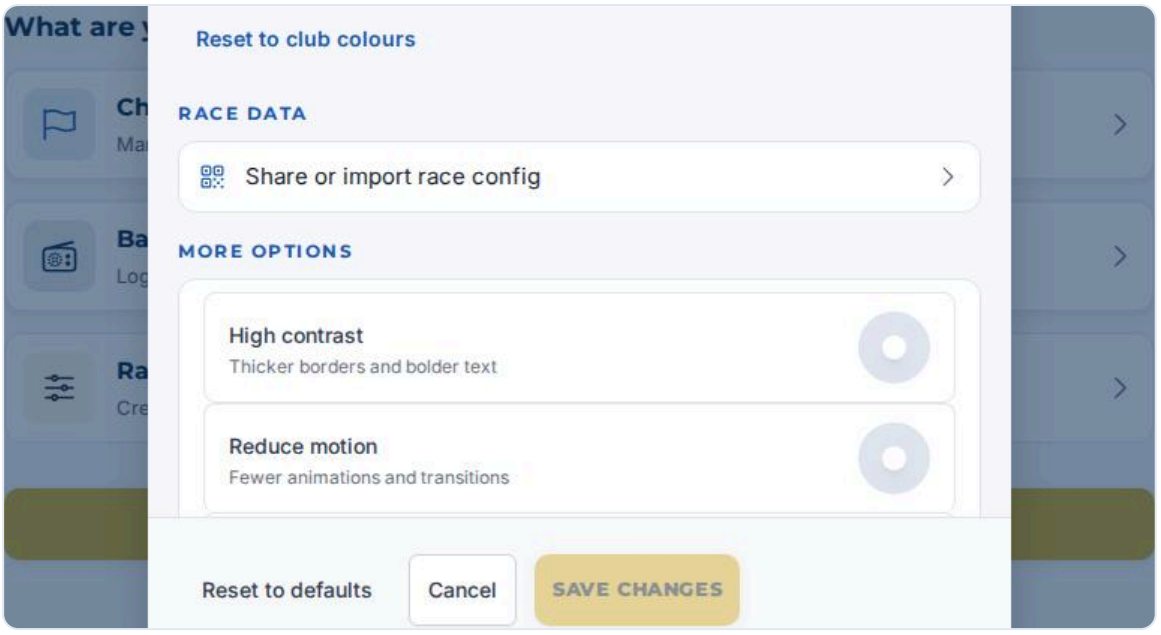

Settings — Race data › Share or import race config

Share race — scan to load this race, or download, email or copy the file

Back — returns to Settings

Locked buttons look locked

Mark off — Mark is locked until a number is typed

Read-out — Next is locked until every number is ticked

Common time 13:20

☐ 100 Read next

☐ 101

☐ 102

TICK EACH NUMBER AS YOU READ · 0 OF 3

RESET

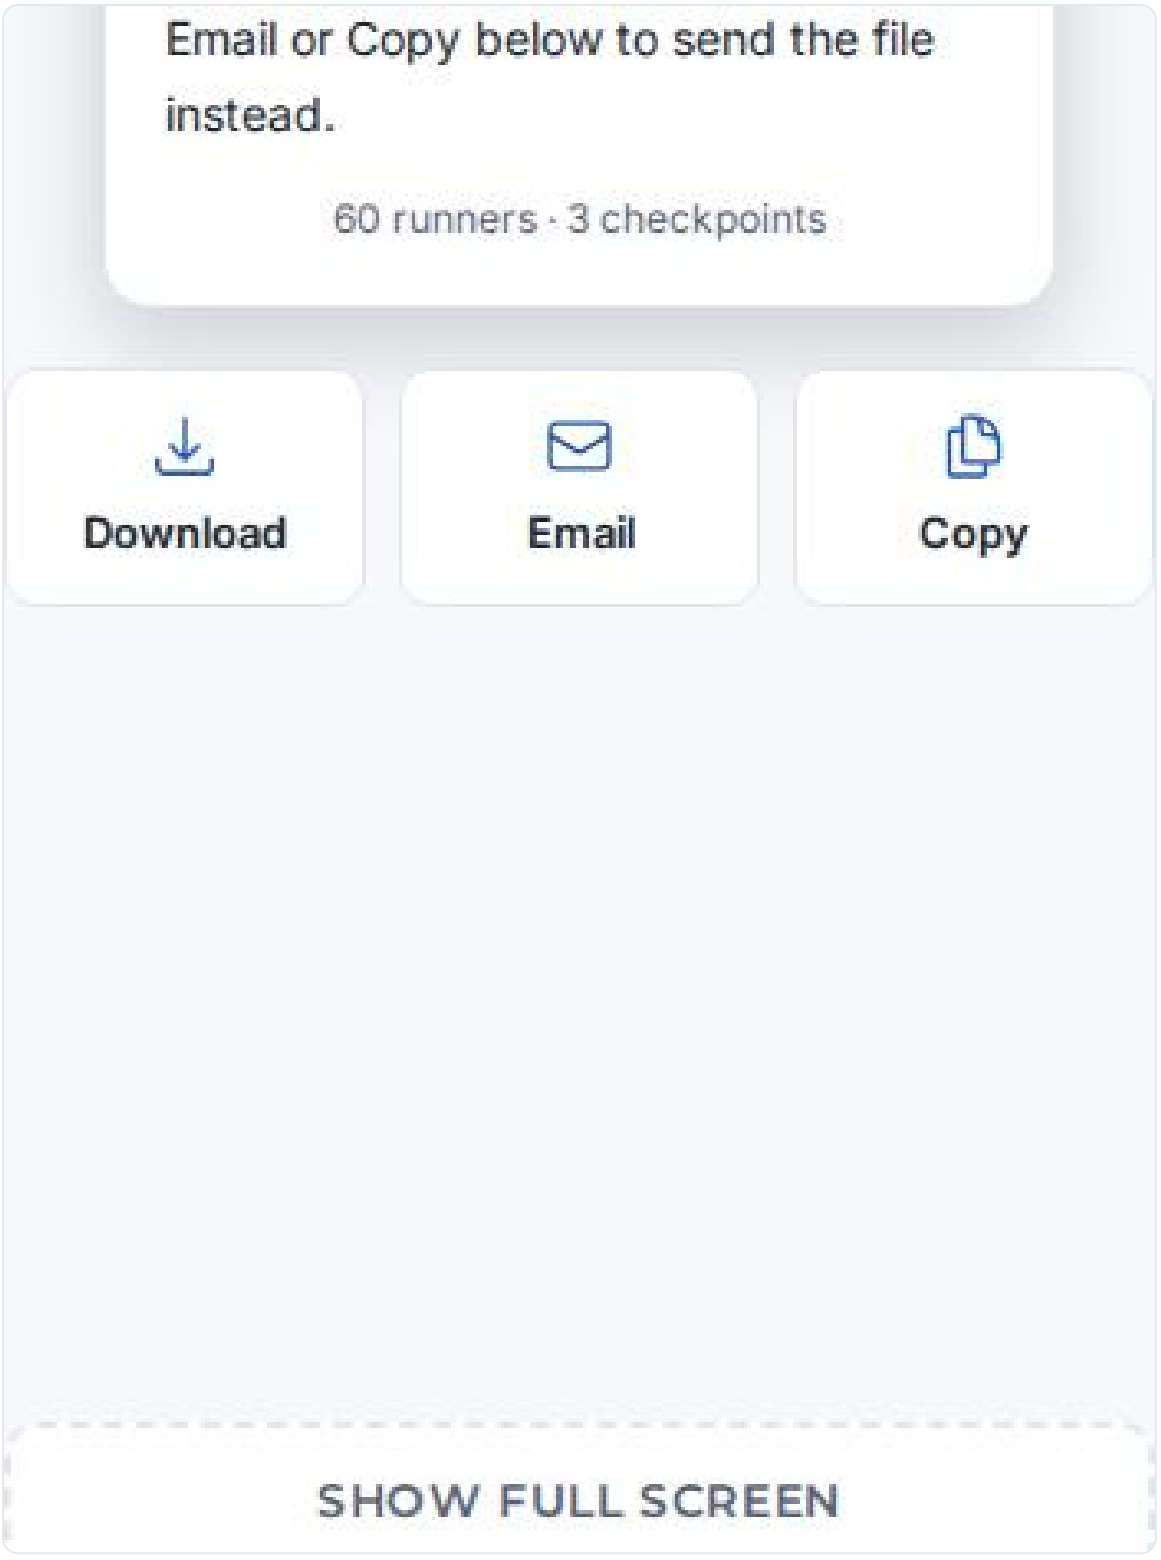

Previous over

Short overs. Up to 5 numbers each, so base can confirm or ask for a repeat without losing the rest.

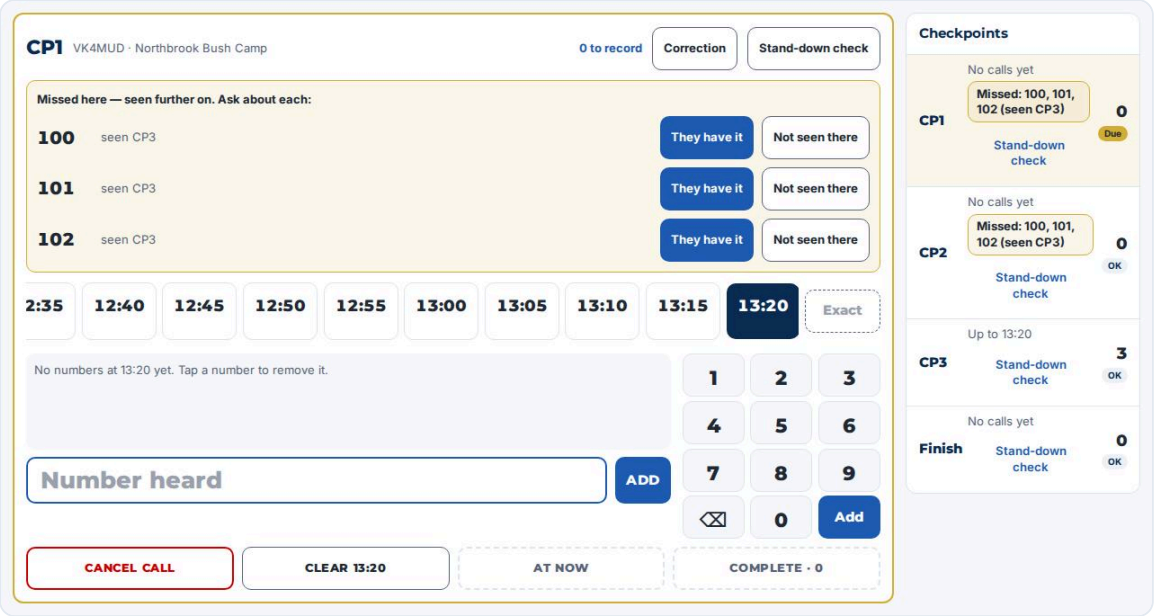

One number at a time. Every bib is read in full, never as a range

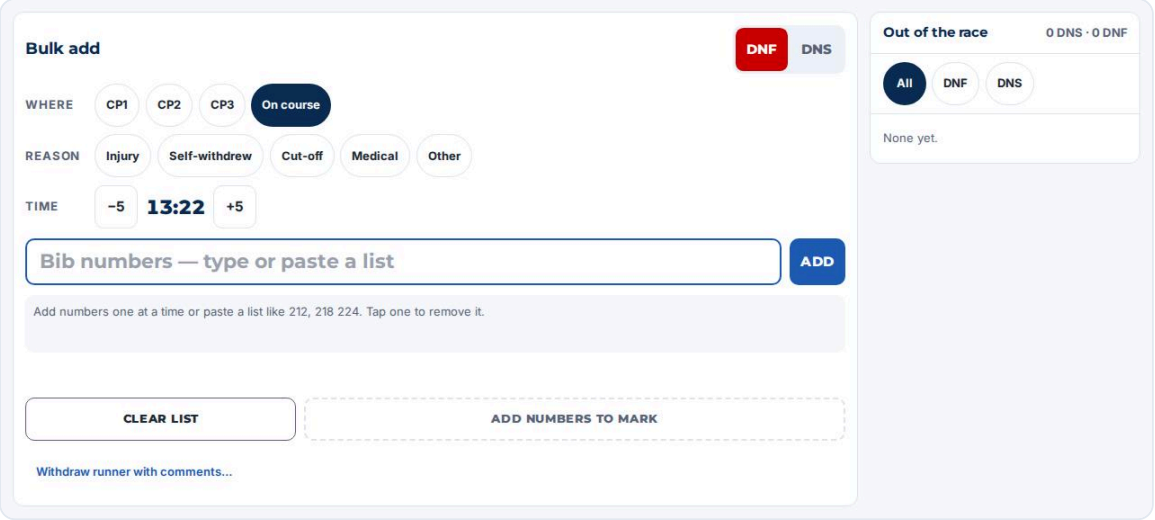

Share race — Show full screen is locked when the race is too big for one QR

Base Receive — Complete and At now are locked with nothing to send

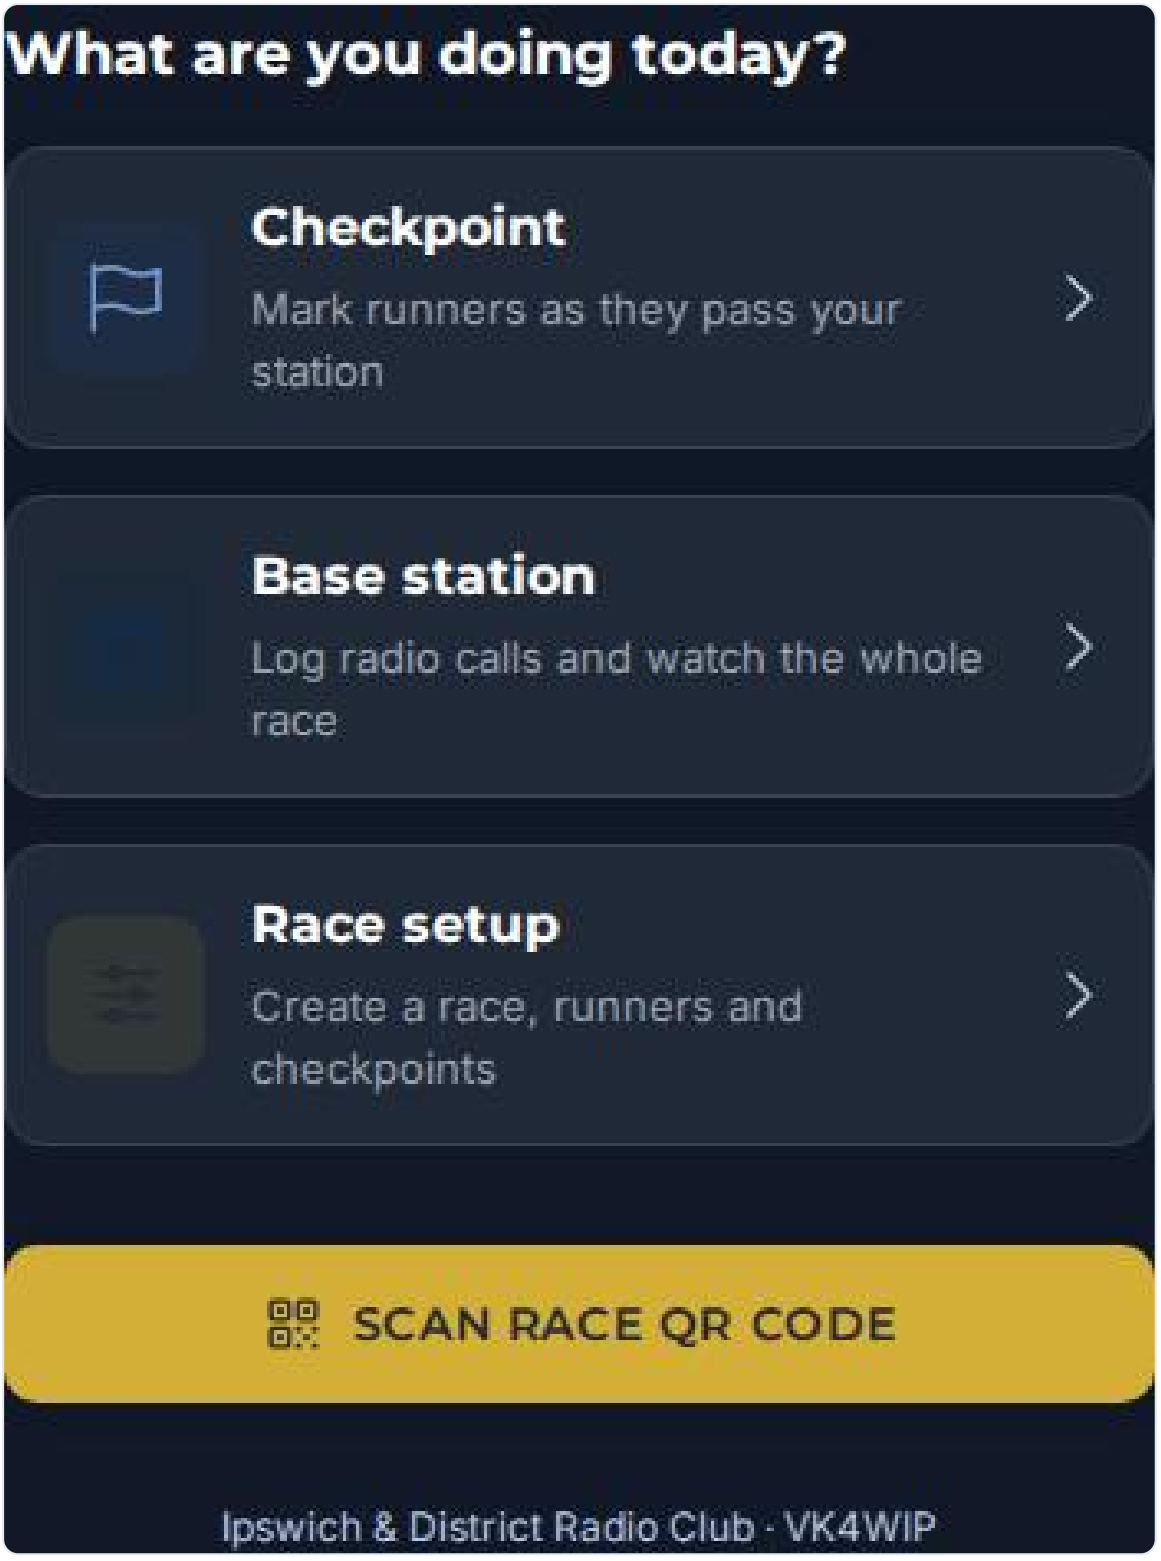

DNF / DNS — "Add numbers to mark" is locked

Dark mode passes colour contrast

Settings in Dark — no contrast failures (labels, links, swatches)

Mark off in Dark — no contrast failures

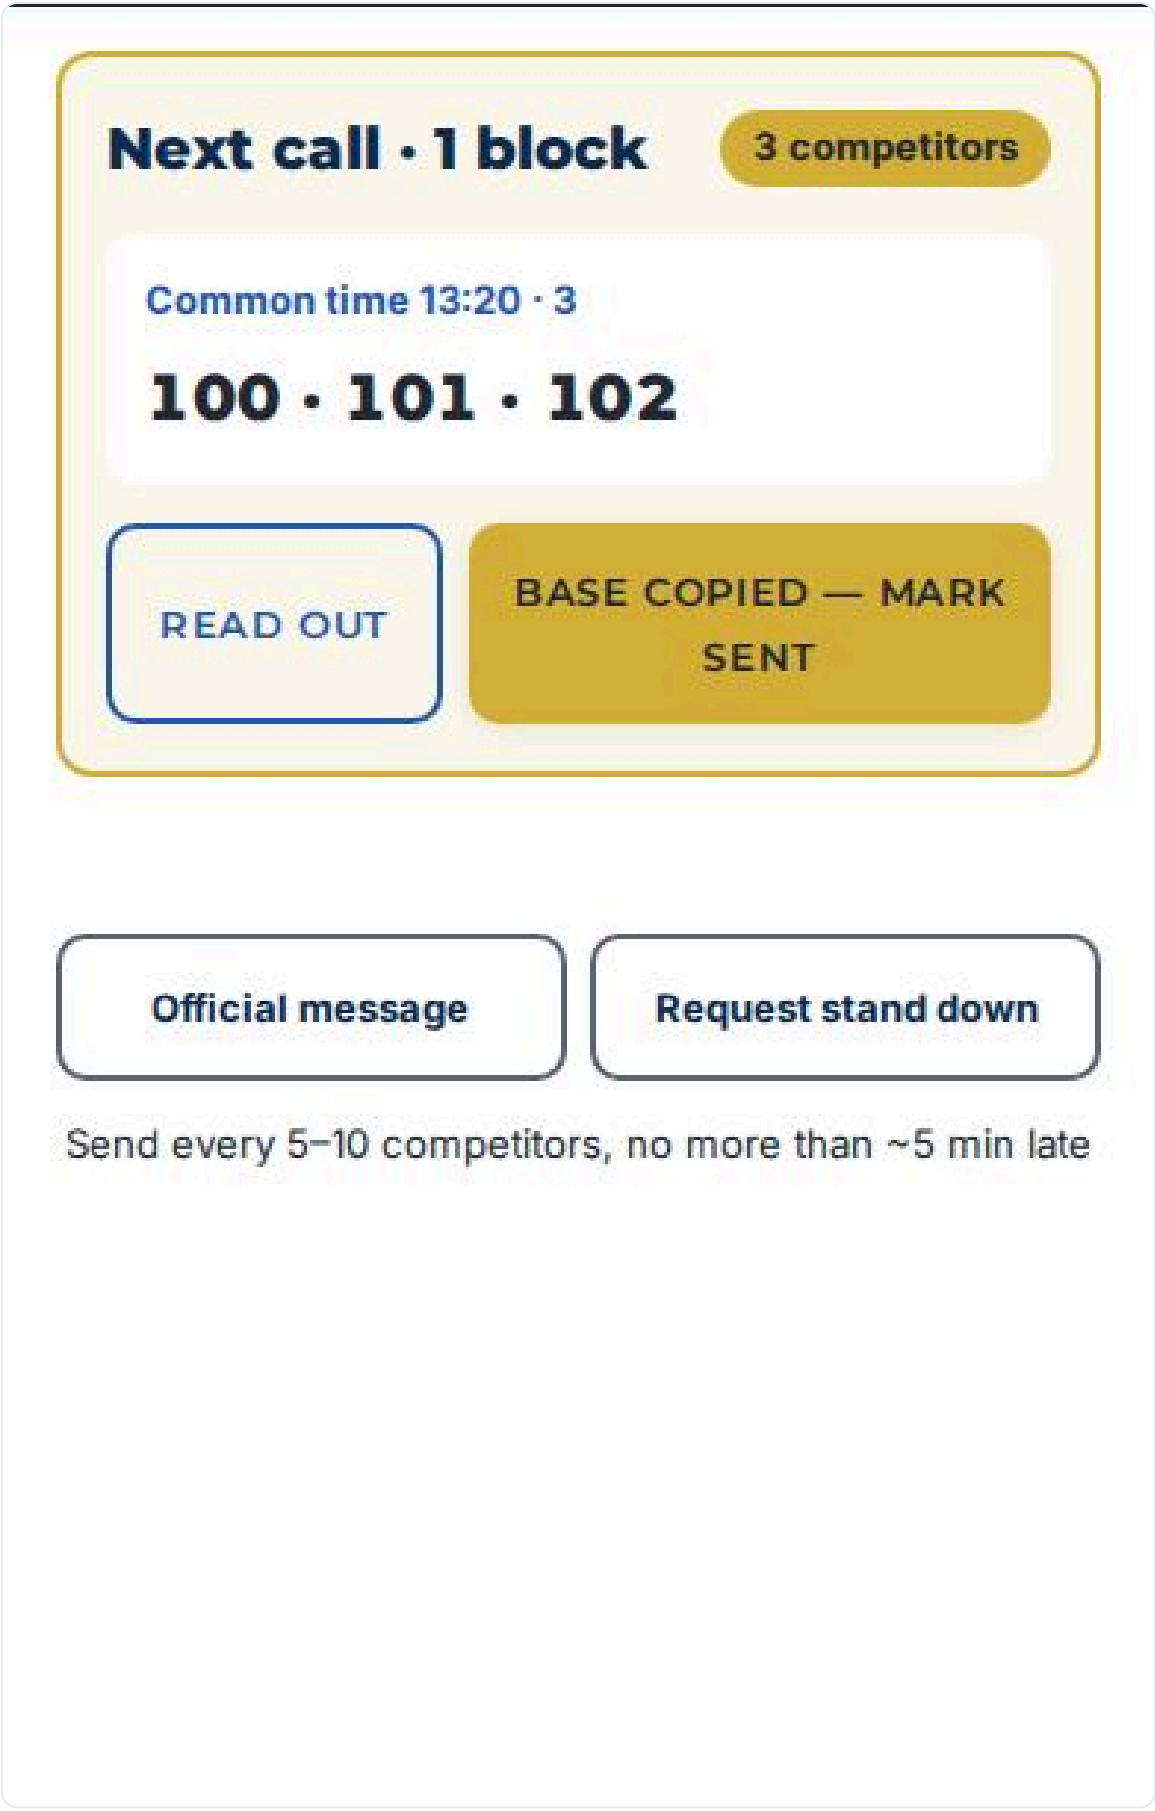

Bib numbers, e.g. 157, 1
MARK
Tap a number as the runner passes. Tap again to fix its time.
